His Fran Likely to Be Adopted. Injunction Against the Northern Pacific.

HELENA (Mont.) Dec. 20.—[Exclusive Dispatch.] The conference of Governors and Attorney-Generals of the Northwestern States to devise means of preventing the merger of the Northern Pacific, Great Northern and Burlington railroads began in the office of Gov. J. K. Toole this afternoon, but proceeded no farther, than organization, with the election of Gov. Van Sant of Minnesota as chairman and Atty.-Gen. Frank Martin of Idaho as secretary. The States represented are Minnesota, South Dakota, Montana, Idaho and Washington, the last named only by its Attorney-General, W. B. Stratton, owing to the death of Gov. John R. Rogers.

The Governors and their legal advises admit that they have no definite plan of procedure, and generally de-

An exception was Afty. Gen. Martin, who said that a suit to prevent the merger might be started in either the Federal or State courie, but that all the States could not be parties to it. He intimated that the suit might be entered in one State, to be selected, and the other States inight with five financial and moral ald.

Atty.-Gen. John L. Pyle of South Dakota said his State had little direct interest in the merger, as only branch

ANOTHER ACCOUNT.

HELIENA (Mont.) Dec. 30.—No action was taken today at the meeting of the Governors and Attorneys-General of the Northwestern States, called to consider plans for opposing the proposed consolidation of the Northern Pacific, Great Northern and Burlington Railway systems. From the discussion at these meetings, however, it is considered probable that the plan of Gov. Van Sant of Minnesota will be indorsed by the executives of other States, who were of minnesota will be indorsed by the executives of other States, who were present, and that the fight against the railroad consolidation will be carried to a finish. What this plan is Gov. Van Sant refused to state, until the

White of North Dakota was also expected to attend the conference, and, in fact, had telegraphed Gov. Van Sant that he would be present. In a later telegram, however, he stated that it was impossible for him to attend the meetings.

The meeting was organized by the election of Gov. Van Sant as chairman and Atty.-Gen. Martin of Idaho secretary. After reading Gov. White's communication, stating that he would not be present, Gov. Van Sant made a brief speech in regard to the objects of the meeting, giving a brief history of the proposed railroad consolidation, and the effect he believed it would have on the States affected.

stockholder, and always be in that position.

Official investigations, long and searching, have led to the conclusion that the Panama project is involved in difficulties almost insurmountable, and certainly not to be overcome without the greatest delay and much vexation. The difficulties have been commented upon from time to time. The concession to the Panama company from the Colombian government provides for the forfeiture of the concession, if it be sold. There would have to be negotiations to have that amended. Then the stockholders in the old Panama company have some kind of lien on the new corporation, not thoroughly understood.

Those who want the canal built, and built quickly, claim there is no occasion for further investigation of the Panama offer. They say such a proposition is purely a dilatory motion, and certain, if adopted, to result in delay, if not in the defeat of canal legislation of a practical character. Everything is propitious, they say, for action on the Nicaraguan bill. The country is interested; money in the treasury to start the work, and the Central American republics favorable, and it is demanded that there be no more filibustering.

(BY THE NEW ASSOCIATED PRESS—A.M.1 WASHINGTON, Dec. 30.—The State Department received dispatches today from the City of Mexico making clear for the first time what is to be expected on the subject of arbitration, which has been the most important and most difficult problem before the congress of American republics. The advices came from Mr. Buchanan, the American delegate, who was assigned to look after this particular question. He states that an agreement on the lines of The Hague conference appears to be favored by the majority of the republics, and that this will probably be the basis of action to be taken by the congress. He also states that those republics which desire to go further than The Hague agreement very likely will sign an independent convention for compulsory arbitration.

The congress is rapidly drawing to a close, and another fortnight will probably bring a final adjournment, so that the determination of the arbitration question appears to be very near at hand. SOUTH AMERICANS DIVIDED.

(BY THE NEW ASSOCIATED PRESS-P.M.1
PORT TOWNSEND (Wash.) Dec. 20.
—For the second time a jury has brought in a verdict of murder in the first degree against Homer Bird. The trial commenced December 19, and on Christmas the jury returned a verdict.

The crime for which Bird was found guilty was one of the most atroclous in the criminal annals of Alaska. When the Klondike gold excitement broke out, Bird left his wife in New Orleans, and in company with another woman and two men started for the gold fields by way of St. Michael, where they started up the Yukon in a small boat. On the way, Bird became jealous of his partners, and while they were in camp and partaking of a meal he shot both. During the last summer, the noted scientist has been continuing his search of experiments with the eggs of the lower marine animals, especially those of the sea urchin, and tonight, in a paper entitled, "On the Prolongation of Life of Unfertilized Eggs of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Sea Urchin by Politized Eggs of the University of the Universi "On the Prolongation of Life of Uniter-tilized Eggs of the Sea Urchin by Po-tassium Cyanide," he told a group of the foremost physiologists in America that, by means of observation of the effects of certain chemicals upon these minute bits of protoplasm, he was ready to make a tentative definition of the heretofore unknown nature of

the heretofore unknown nature of death.

Death, Prof. Loeb affirmed, was not a negative process, a simple breaking-down of tissues, as it has been regarded up to this time, but an active agent, born with the birth of the egg, and destined, if not checked, to gain the upper hand of the life instinct and bring about extinction. But, greater even than the appurent discovery of this death agent, in all life substance, is Prof. Loeb's announcement that he had been able to check the agent, in the eggs of the sea urchin, at least, by means of chemical agents. This, it is said, means nothing less than that, on a minute scale, the secret of eternal life is in the power of mankind.

The experiments, Prof. Loeb said, were simple. Unfertilized eggs of the sea urchin were placed in a weak solution of potassium cyanide and abandoned for several days. In ordinary conditions, an unfertilized egg dies in a few hours, destroyed by the death

doned for several days. In ordinary conditions, an unfertilized egg dies in a few hours, destroyed by the death agents born with it. At the end of several days the eggs were again examined, and were found to be still capable of fertilization and of producing healthy animals.

In explaining the results, Prof. Lock

SAYS PROF. LOES.

Said that the "mortiferous processes" were due to the actions of certain ferments of an unknown nature, whose destructive tendency was counteracted by the potassium salts.

Seeveral other papers of importance were read during the meeting. Prof. D. J. Lingle of the University of Chicago gave the results of his research into the effect of common salt upon the heart beat. He affirmed with great emphasis that, contrary to the statements of Prof. Howells of Harvard, salt is the sole agent responsible for the rhythmic action of the heart.

Prof. F. S. Lee of Columbia University made some interesting reports upon the action of alcohol upon muscles. By experiments upon the frog, he demonstrated that a small amount of alcohol increased the working power of muscle, enabled it to make more rapid contractions in a given space of time and delayed fatigue; that, in short, it made the muscle a much better machine. In larger quantities, however, alcohol was detrimental in all respects.

Mr. Hotchkiss, advance man for the Collemarini-Repetto Grand Opera

Concert Company, called in at our store with picture to be placed in window stating that the artists would arrive within a few days and would then call upon us to make selection of Steinway pianos which they wished to use during their concert in this city, they preferring the Steinway to all other makes.

Mr. Healy, business manager for said company, accompanied by Mr. Bemoist pianist also Mr. Russo-tenor called for the purpose of selecting pianos; it was then that they stated their desire for four Steinway planos for stage and parlor use; upon our refusal to comply with this request they stated that they would consider the matter and call again, which they did, and were willing at this time, in order to secure a Steinway, to take one Concert Grand for stage use, one Parlor Grand for the use of Mr. Renoist, one Starr and one Marshall & Wendell for the use of the other artists. We did not find it convenient to grant this request for the reason that we keep for Concert use- one Concert Grand Steinway piano, which was used by Walter .. Damrosch, and we did not care to have our new Steinway Grands carted about the country; it was after this refusal that the other planes were selected. So anxious were they to secure a Steinway that they agreed to pay the cartage on these goods- which is unusual. We make this statement in justice to the Steinway and our former

public statement. But for worrisome reading might add further detail conversation that would throw stronger light on the real desire of these same. E. d. Gussler -

COLUMBUS (O.) Dec. 20.—The Ohio Legislature, which elects the successor of Senator Foraker, commences here next Monday. The party caucuses to nominate candidates for presiding officers and other positions in both branches of the General Assembly will be held next Saturday night. As the Republicans have a large majority in both houses, and as there is no opposition to the reflection of the Senator. The Senatorial question for this session is settled, but there is a very bitter contest in progress bearing on the re-election of Senator Hanna two vears hence, as it is said that a majority of the Republican members will be re-elected to the next Assembly.

Senator Foraker is at his home at Cincinnati, and Senator Hanna remains in Washington. Neither is expected here this week, but both are in constant communication with the leaders of their respective forces. John R. Mailoy, secretary of the State Committee, and coal inspector under Gov. Nash, is manager of the Hanna forces, and ex-State Chairman Charles K. Schwarts, who was private secretary to Foraker as Governor, and who headed the fusion in the Legislature against Hanna four years ago, is manager of the anti-Hanna forces. It is claimed by the Hanna mem that the present contest is "the same old factional fight of 1897-86 over again." The Foraker men claim that they are simply exercising their right to support their friends.

Both factions have their respective tickets for the caucus nominations,

the party caucuses, but it was carried into the Legislature. It is conceded by both sides that the results of the caucuses next Saturday night will be final.

WASHINGTON, Dec. 30.—The Mary-land councils of the Junior Order of American Mechanics tonight presented to Restr-Admiral Schley a magnificent medal, studded with diamonds, as an

evidence of their personal esteem and admiration of his services to the country.

The presentation took place in Rear-Admiral Schley's apartments in this city, and was made by a committee from the councils, which came over from Baltimore on an afternoon train. Rev. C. F. Wyatt, acting as spokesman of the committee, referred to Rear-Admiral Schley's participation in the battle of Santiago and his conduct following it, and added that his unselfishness had endeared him to the hearts of the American people. Referring to the court of inquiry, Dr. Wyatt said that the people had sympathized with the rear-admiral in the ordeal through which he had passed, and had substituted the minority report for that of the majority, because they weighed opinions rather than counted them.

Rear-Admiral Schley sincerely thanked the committee, and added: "The services which this beautiful emblem is intended to commermorate were those which every lover of home and country will gladly perform for his people and for their prestige. It was my good fortune to have participated on that eventful 3rd day of July in an engagement which readjusted the geographical lines of this continent, and this testimonial from your organization is only another recognition from my fellow-countrymen that these services have met their approval. I thank you again for this kind tribute."

NORTHERN PACIFIC TIED UP BY PETER POWER'S PETITION.

FROM DISTRICT COURT.

Cannot Issue or Sell Any Certificate of Indebtedness—Harriman Suppose to Be at the Bottom of the Proposi tion-Points from the Legal Papers.

IBY THE NEW ASSOCIATED PRESS—A M.1 MINNEAPOLIS (Minn.) Dec. 30.—Judge Elilott of the District Court of Hennepin county today granted a temporary restraining order against the officers of the Northern Pacific company to prevent them from retiring the preferred stock of that company. The order was issued on the application of Peter Power of New York, who holds a hundred shares of the common stock. It was supposed that the failure of the action brought in the New York courts by holders of preferred stock cleared away the last obstacle to the retirement of the preferred stock January I, leaving the Hill interest in control of the road through its majority of the common stock. It is inferred, although it does not so appear, that the present action is brought in behalf of the Harriman interest to prevent control passing out of its hands for another year, or until the legal standing of the Northern Securities Company is settled.

of the Northern Securities Company is settled.

The claim set up by power in his suit is that the retirement of the preferred stock is in violation of the agreement that such retirement would lay no additional burdens upon the common stock, and he holds that the certificates of debenture bonds to be issued to effect the retirement of the preferred would become a lien upon the common stock, and thus work an injury to his property. It is understood that the block of 100 shares held by Power is the only block of common stock not controlled or definitely located upon one lide or the other, the Harriman people or the Hill-Morgan interests.

The restraining order will not only be served upon the officials in Minnesots, but will be telegraphed to New York and served upon the officials there.

INJUNCTION AND PETITION.

IBY THE NEW ASSOCIATED PRESS. P.M. The petition recites briefly the history of the Northern Pacific Railroad
and the division of its stock into common and preferred. It is aileged that
the only difference between the preferred stock and the common stock was
that the preferred stock was entitled
to the 4 per cent. dividend prior to anything being paid on the common stock,
and the bill in this connection alleges
that the preferred stock was subject
to be retired at any time within
twenty years after the time or reorganisation of the company, and the

three of the corporations mentioned in the bill and their various systems of railway, so that all competition between these companies may be stifled and prevented, and that unjust and unequitable and exorbitant rates for both freight and passenger traffic may be obtained by them.

The bill further sets forth that it is the design and purpose of the Northern Pacific Company, the Great Northern Railway Company and the Chicago, Burlington and Quincy Railway Company to consolidate and merge in the Northern Securities Company the complete and exclusive control of each and all of these railway systems; and that the proposed attempted retirement of the preferred stock of the Northern Pacific Company is solely for the purpose of enabling the Northern Pacific Company to turn over to the Northern Securities Company a majority of the stock of the Northern Pacific Company and that the proposed and attempted creation of an indebtedness of \$75,000,000 on the part of the Northern Pacific Pailway Company is solely for the purpose of the part of the Northern Pacific Pailway Company is solely for the purposed on the part of the Northern Pacific Pailway Company is solely for the purposed and attempted creation of an indebtedness of \$75,000,000 on the part of the Northern Pacific Pailway Company is solely for the pur-

It is alleged that, in case the North-ern Pacific Railway Company proceeds to and does carry out the plans and schemes alleged in the complaint, the plaintiff will be irreparably damaged, and that he has no remedy at law for his damage or injury or any part of it, either against the company or the offi-cers thereof.

THE COPPER INDUSTRY.

Defense of the Michigan Mining Interests.

Question of Curtailing Production.

Useless to Expect Reduction in the Output from the Lake District.

HOUGHTON (Mich.) Dec. 28.-The Michigan copper mining interests have recently been made the object of a savage attack by a prominent Mon-tana newspaper, the accusation being mad that the Amalgamated interests mad that the Amaigamated interests
have been holding out for high wages
and generous treatment of employes,
while Michigan mines an miners have
been taking a course diametrically
opposite. The argument is a trifle farfetched, and is perhaps best answered retched, and is perhaps best answered by a glance at the conditions prevali-ing in the two States. The Butte mines are working under check, with thousands of men idle, those who, are at work receiving the same wages as formerly. The Michigan mines are working full forces, about 16,000 men being employed, at the same wages as for some months past, these being the highest ever paid in the Lake Su-perior mines since the early days when the highest ever paid in the Lake Su-perior mines since the early days when obig wages were consumed by the very high cost of living. It is doubtful whether the copper mines of Montana are now working more than one-half as many men as are employed at pres-ent in the lake copper mines. The Miners' Union, a power in Montana, fixes a minimum daily wage of \$3.50 for every man who goes underground. This is from \$1 to nearly \$1.50 higher than the minimum wage paid in the lake mines, but the mines of this dis-trict offer two advantages that nearly or quite offset the lower wages paid, these being the lesser cost of living and the far steadler employment given mine workers. For these reasons there are few miners having steady places who quit jobs in Michigan copper mines.

mine workers. For these reasons there are few miners having steady places who quit jobs in Michigan copper mines.

The inference to be drawn from the attack on Lake mines and miners, published by the Montana journal, is that the Lake mining companies should have curtailed production at the same time such action was taken at Butte. Whether this would have aided the workingmen is open to very great doubt. The Michigan miners seem to think that they do better by working full time at the best wages ever paid than they might do by working part time, or having 5000 or 6000 men thrown out of work. The partial cessation of production by the Butte mines has not held the price of copper up. The artificial regulation of prices is a dangerous game. A strong concern may hold prices steady for a time, when there are signs of a break, and can also keep prices down when they show tendencies toward a too-rapid advance. Both of these things have been done by the United States Steel Corporation within the present year, but the influence brought to bear on the market was of a temporary nature, and was not used drastically. The maintenance of 17-cent copper by a partial stoppage of production in any given field, such as Montana, redounds to the permanent injury of that field. While the Montana mines are working under check the mines of other fields are making big profits and placing themselves in a position to meet a lower price for their product. Noteonly this, but new mines are being opened in many fields. Were the leading Lake mines to join the principal Moniana properties in a restriction of output, the price of copper could readily be restored to 17 cents, but where would the profit lie? It is true that a mine making copper at a cost of 10 cents per pound can net as large profits on half its normal output with copper selling at 17 cents, but where would the profit lie? It is true that a mine making copper selling at 13 cents, but while such a mine is working undercheck new fields are being opened, new producers are coming into

making every pound possible, and selling it at the artificially high prices made possible by short-sighted restriction. No mine can make copper as cheaply when turning out half its nor mai production as when working its cheaply when turning out half its nor mai production as when working its cheaply, superintendence, taxen, etc.; which remain the same, and such fixed costs spread over a smaller tonnage bring up the cost of making copper quite rapidly. The lake mines are occupying the same position now as they have since the inauguration of 17-cent copper when the Amalgamated Copper Company was organized. In plain English their policy is ever man for himself and devil take the hindmost. This is the way they have managed their affairs for the past twelve years. In the earlier days of lake mining three were many pools—mostly of the bob-tailed variety—and repeated failures following every attempt at an understanding as to prices or production. Sometimes it was one company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, the company and sometimes another, that kicked over the traces—of the company and sometimes another, that kicked over the traces—of the company and sometimes another, the company and sometimes another, the company and sometimes and the company and the carrier and the company and the company and the carrier and the ca

the world, is dead. The end came Sunday at San Francisco at the house of Chris Buckley, to whom Bauer was the means of giving an income from the earnings of prostitutes which was and is greater than that earned by many railroad presidents. The cause of Bauer's death was paresis, due to an appetite for drink that was the wonder of all who knew him. For several months it had been known that Bauer was on his deathbed and, although he was but 49 years of age, he was, in point of experience, twice as old. Crowded into his forty-nine years of fife had been more of sin, more of debauchery, and more opportunities than usually come to half a dozen men.

Bauer first came into prominence as an athlete and wrestler, and as such he gained an international reputation. He met and defeated some of the most expert men the last century produced, but drink undermined his strength, and while yet a prominent figure in the world of athletic sport, he came to Los Angeles. That was years ago, and he invested his money in realty in the section which is now given over to members of the half world, and is known as the crib district. His income from these investments was enormous. From that time on he lived off the earnings of fallen women, and even to that class he was cruel to a surprising degree. The adage which enjoins saying only good of those who are dead cannot apply to him, and among those who felt his cruelty the news that he is no more will be received with a feeling of satisfaction.

Politically he was a small power and controlled many votes of persons like himself. From women who rented his property he wrested many a time their last cent, even when he knew that they were hungry. Chris Buckley became a sort of trustee for the property, which was owned jointly by Bauer and a brother, who lives in Barcelona, Spain, and Buckley found in the trust a good thing for himself financially. Several months ago Rauer was adjudged insane, and sent to a private asylum near Livermore. From there he went to Buckley's house at San Francisco, hi the world, is dead. be fully protected in the exercise of
their rights at the poils. The result
of the election will be as fully as possible an expression of the popular will,
and the American authorities, in their
final exercise of power, will see that
the will of the voters, as expressed
through the majority of the votes

the officials elected.

of an estate in Holland valued at \$80,000,000.

The recent marriage of Chauncey M. Depew to Miss May Palmer, who is also one of the heirs, seems to have given fresh impetus to the efforts to secure a division of the estate, and there is a general movement all along the line. Nelson and Dr. J. A. Cromkhite are heirs in direct line of descent from Jacob Cronkhite, and if the spellbinding qualities of Mr. Depew's eloquence can be effectively worked on the Hollanders, about a half-million of the accumulated wealth will find its way to Los Angeles. The story goes that away back in 179c Caspar Cronkhite of Holland, who was backed to read the story because they took up arms against Great Britain and fought with the American revolutionists, decided to put his property forever out of their reach. He accordingly made a will, placing his property in the hands of the government of Holland, to be divided among the heirs of his two brothers, 100 years after his death.

It is probable that mose of the speakers who poured swifful eloquence at the Council on the use and abuse of sewer irrigation, really thought the council on the use and abuse of sewer irrigation, really thought the their rearries would do more good and the council of the legislators, for, a few minutes, before the assion, and then disappeared, will do quite as much toward shaping the final action of the week ago, asking that the city permit the use of sewage on corn. grain and trees, at that time the discussion of the matter was postponed upon the matter was postponed unit yesterday, when a large delegation appeared in the lobby to urge that the city owns a fifteen-foot right of Superintendent B. T. Tilden of the outfall sewer, outlined the conditions without taking any partisan stand. The city owns a fifteen-foot right of the lattere miles. Along this street he reaks occur, and the settling heart and the state of decay that it is constantly breaking. Between the place where the breaks occur, and the settling chamber, lie the lands upon which the petitioners ask to use the sewer water. When a break occurs in this inverted sphon it is necessary to shut down a street. Then a large engine has to be taken to the seem of the trouble and the water in the siphon pumped out before the break can be repaired.

Now it is asserted that if the city reak of the city to do anything with the sewer shut off the flow at the settling chamber, lie the lands. This, it is stated, would make it almost impossible for the city to do anything with the sewer and many claims for damages would be preferred against the city for flood. The farmers on their part assert that they are badly in need of water, and that the use of sewage on trees and grain can do no harm. They maintain that they have come to the resure of the first part of the city have and many claims for damages would be preferred against the city for flood. Councilman Allen favored the appointment, and moved that the City Attorney be instructed to prepare the necessary ordinance. Pierce objected. He said that the time has come to call a halt. The Council had appointed two new deputies, and the matter should be referred to the Finance Committee to see whether there is money in the treasury to pay the additional salary. After some further debate a motion to refer was carried.

Joseph Ross of Pomona, 70 years old, was made defendant yesterday in an was made derendant yesterday in an important suit begun by children of a former wife, James R. Ross, Agnes D. Sacry and Mary L. Freeman, all of whom charge their father with trying to deprive them of valuable property claimed to be the separate estate of

all situated in Pomona.

Plaintiffs claim that this property, although it stands in the name of their father, was acquired and purchased by him with moneys inherited by the mother. She had the utmost confidence in her husband, and it was he who transacted all her business. They lived in Indiana until they removed to Call-fornia, and there are still some holdings now alleged, is held in trust for plaintiffs, who are the sole heirs of their

scene in 1898. She is Betta A. Ross.

Now the children of the first wife lay all their father's unnaturalness at the stepmother's door. She is fiving on the old home premises, and is said to have her old 'husband wholly under her control and influence. They say that her constant intent is to deprive his children of their property and convert it into money, and that she persistently urged him to deed her a one-third interest in all the property. On March 22, 1900, she filed a declaration of homestead on the property.

The children also aver that their father is endeavoring to sell the Indiana property at a figure much less than its real value, and they allege that this step is also at the instigation of his latest wife. But the cap sheaf of their troubles was laid on the heap, when, on March 22, 1901, Ross gave her a mortgage on most of the Pomona realty to secure a note for \$2120.52, payable one year after March 11, and now they believe that he is about to dispose of all of the property involved.

the sole devisee. The principal item of the estate is the Hope Villa property at the corner of Hope and Eighth streets.

Mary Ferguson died in this city on February 24, 1857, and her property in Los Angeles county consists of lot 1, block 29, of the Huber tract, (Hope Villa,) estimated to be worth \$25,000, and having a rental value of about \$255 a month. This property, which is all improved, is alleged to stand of record in the name of Charles H. Hayes of New York City, but petitioner affirms that said real estate and its improvements were merely held in trust for Merel of Huber in the held in trust for her estate after her death.

"But," says petitioner, "the said Charles H. Hayes now claims the same as his own property, which claim is undounded and erroneous."

It is also alleged that the deceased left other estate, consisting of an interest in certain property in New York City, but petitioner does not know its nature or value, although she believes that it stands in the name of Hayes—"in trust," she says, "for the estate of Mary Ferguson, but which trust, as petitioner, is informed and believes and alleges, said Hayes denies."

Deceased's will bears date of January 25, 1884, executed in New York City, and petitioner (then known as Anna M. A. Burtis, was named as executrix. and then he said something about not wanting to track snow all over the house and vanished.

As for the old lady, she heard not, She was looking at the three little boys, who blinked at her, blinded by the darkness without and the sudden glare of light within. Then the biggest one pulled off his cap.

"Happy New Year, grandma!" he sang out, and even as he did so he was turning to peel off his little brother's cap. "Jimmy's too little to take off his own cap, and Cousin Richle, too, and we all brought some cookles and candy from the party for you. My, I could hardly walk, and grandpa had to carry Richle, and Tommy Mulleny helped Jimmy. But I'm glad it snowed. It is believed that a sale of the
Fairview mine on Trinity River, near
Mineraville, will surely be effected. The
property has been under bond for
several months, to the Altoona Quicksilver Mining Company, of which
Joseph Porter is manager. The bond
was to expire on March 1, 1902, but
an extension of time has been granted
the company by all of the owners excepting, one who owns an eighth interest. The figure named in the bond
is \$60,000. A drift has been run on
the ledge a distance of 300 feet, and
gives a depth of nearly 300 feet. The
ledge is over three feet wide, and the
ore is very rich in free gold. Development work has proven very satisfactory, and it is believed that the purchase of the property will follow.

The Kidneys

If your kidneys are out of order you don't feel like going to work when you get up is the morning. Your back is lame and sore, and aches, and your sleep has not been refreshing.

Faifure of the kidneys properly to perform their functions often makes a failure of life itself-it weakens all the energies,

Hood's Sarsaparilla contains the best and safest substances for invigorating and toning the kidneys. It was taken by Mrs. V. Kerr of Indiana, Pa., who writes: 'I had kidney trouble and took medicine for it without benefit until I began taking Hood's Sarsaparilla. The awelling in my feet and iimbs then began to go down and I am now able to work. I believe Hood's Sarsaparilla saved my life."

property is closed, says the Redding Bearchlight. The management announces that the shut-down is temporary, and that operations will soon be resumed. In Redding there are ugy rumors afloat that the fire of a year ago was never extinguished. Miners there are who say that the fire which caused all the tunnels to be closed twelve months ago, in an effort to smother the flames, was never totally quelched, and has now broken out with renewed fury.

WICKENBURG SHLVER FIND

WICKENBURG SILVER FIND.
Another silver strike has been made in the Wickenburg country, and, according to news received in this city, the find is an important one. The report is that Dr. R. S. Brown and R. A. Roberts, while doing prospect work on two claims about a mile east of the Sahuaro group of mines, uncovered what promises to be an even richer strike than the Sahuaro, although the general character of the ore found is similar. This new discovery of ore carrying several thousand ounces of silver to the ton, has caused quite an excitement in that locality, and it is believed will start a rush to that now promising field.

Aged Dupe of Fleishman Kills Himself.

Preferred Death to Want and Poverty.

Jardener Miller's Corpse Found in the River Bed-Testimony at Inquest.

With a rusty oid revolver grasped firmly in his hand, the body of a gardener named Miller, whose Christian name is unknown even to those who had been acquainted with him for a large time, was found yesterday morning in the river bed about 300 feet south of the Main-street bridge. He had shot himself in the mouth, and the bullet had entered Lis brain, causing instant death. There is reason to believe that the flight and theft of Henry J. Fleishman, cashier of the Farmers' and Merchants' Bank, was a real reason for the suicide, for the a rd man had entrusted to the defaulter nearly all the money he possessed, and is supposed to have been be to secure an accounting at the bank.

seased, and is supposed to have been roles to secure an accounting at the bank.

Miller was a veteran of the Civil War and had received wounds in the service, the marks of which were plainly to be seen when his body was stripped at the undertaking establishment, to which it was taken by order of the Coroner. It was not until old age and incident infirmities rendered it almost impossible for him to earn a livelihood that he had applied to the government which ae had helped to sustain for the pension which he might have been drawing for years. When he did make that application several mon.hs ago, h.j. claim was quickly allowed, and he was granted a pension of 344 a quarter, and the back pay amounted to 3744, all of which was paid him at once.

The old man had no use for such a sum, other than to invest it and live off the interest. That interest, together with the 344 which h. received every three month; was sufficient to keep him from want, and he would not hav. had to work under proper conditions. Soon after he received the money he took it to Fleishman, and asked him to invest it in government bonds for him. Just what the dishonest cashier did with the money will perhaps never be ascertained, but it is known that he and Miller had trouble over it, Miller being far from satisfied that he had been fairly treated.

To his friends Miller stated that Fleishman's flight seemed to prey upon the old ar's mind, and he requently spoke of the fact that he would have to work all his life, when he had expected to live off his pension and the interest on his back pay.

The last seen of Miller alive was sunday evening, when h, attended a meeting of the Volun'ee of America on East First street. He became greatly excited and left before the meeting was over. He probably went directly to the place where his body was found, and there killed himself. The body was discovered by men who were walking along the Santa Fé tracks, and as soon as the Coroner was notified he ordered it removed to Garrett's undertaking rooms. There late ye

given an old pistol, and it was with this that he ended his career. No money was found on the body, but it is known that Miller had sufficient coming to him from the government to pay for his funeral, and he will be given a decent burial. The Coroner's jury rendered a verdict of death by suicide.

Patrolman Pawling Found in a Saloon After Hours, Suspended by Chief Elton

After Hours, Suspended by Chief Elton and Reported to Commission.

There is almost certain to be a vacancy in the police force this morning as soon as the Board of Police Commissioners has an opportunity to take action upon a report which will be made by Chief Elton. Patrolman Pawling is likely to be dismissed from the force. He is now under suspension and Chief Elton has filed a written report to the board charging him with a serious infraction of the rules of the department.

Sunday morning about 2 o'clock while Chief Elton was walking home he found the saloon of Antonio Ferrario, No. 179 San Fernando street, open and Joing business. Under the law the place should have been closed at 1 o'clock a.m., and the chief entered the saloon to investigate. The first man he saw there was Patrolman Pawling in uniform. Pawling is said to have been trinking and not only was he violating a rule of the department by being in the saloon but he was manifestly not performing his duty in that he did not arrest the saloonist for keeping his place open at such an hour.

The Chief took notes and yesterday he secured a complaint against the saloon man and caused his arrest. Ferrario pleaded guilty in the Police Courniasioners today. It is not considered probable that he will demand a trial, but if he is given the opportunity he may resign. The saloon man may lose his license the city ordinances making it mandatory upon the Board of Police Commissioners to revoke the license of a saloonkeeper who has been convicted of keeping his place open after hours.

strong identification of Bill Smith has served to bring to light another case quite as strange and of greater human interest. It concerns the recent death of Cornellus Leonard, a dope-fiend ragpicker in Los Angeles.

Leonard had for at least five years past been a familiar figure on the streets of this city. He was a confirmed victim of the hypodermic branch of the morphine habit, and his sole ambition in life seemed to be to make enough money to keep him supplied with the degrading drug. street, just round the corner from the tramp hang-out on First and Los Angeles streets.

In one end of the dark little hall, fitted up with rough wooden benches, was a huge Christman tree bristling with lights and gleaming tinsel.

Children began swarming into the hull long before the hour for the openit. They had pasim singing and devotional exercises and a class of little girls in wand drill and tamborine drill, which was all very pretty, but it wasn't Santa Claus, and the audience kept a weather eye out. The audience kept a weather eye out. The audience watched the Christmas tree with close suspicion, and the children, when they began to sing a song about "He is Coming," stood up unceremoniously and craned their necks and the keen moral effect of the ditty was lost in the shuffle.

There was a bustle and commotion at the back door, and a quaint old gentleman, with the cotton of many winters on his brow came plunging through, ringing a bell.

The audience stood up and kicked their heels together, and got into each other's way and howled and shricked with delight, but before they got this fairly out of their systems there came anothe: tremendous ringing, and Lord bless your soul if here didn't come another Santa Claus through the window.

At this point the audience set aside

CHIMBLEY TOGEDDER."

Santa Claus made the hit of his life at a Salvation Army Christmas tree in this city last night. He wasn't criticised because he got in late, but a merry Christmas row was looked for because there were two of him. Children of poverty are pathetic enough when they are miserable, but

ha — a good time. It takes so little. There was a mite of a darkey girl with big round eyes, who hadn't had any regular Christm s. Santa Claus had passed her by. Somehow or other she was perfectly resigned to it. You would hardly have known there was any wistfulness in her eyes when Christmas morning came, and for her it was not a whit different from any other morning.

But yesterday a woman in a poke bonnet came to her house and invited her to a reception to meet Santa Claus. The child was almost frantic with excitement.

Sonora, Mex., arrived yesterday, and is staying at the Nadeau.

M. P. Watson and wife. and Misses Mary P. and Sara J. Watson, tourists from Bay City, Mich., are at the Westminster.

Frederick Kiesel of Sacramento returned from Catalina with his wife yesterday to the Westminster, and leaves today for Coronado.

A. H. Tuttle and wife. Miss Tuttle and Miss Anna Seeley Tuttle of the University of Virginia, Charlottesville, arrived last night and took apairments at the Westminster.

Herman C. Rohns and wife, and Harold L. Arnold of Mackinac Island compose a party of Michigan tourists at the Van Nuys Broadway.

Among the arrivals yesterday at the Angelus were J. E. Bosford, Port Huron, Mich.; James J. Crossley and wife, Des Moines, Iowa, and W. A. Pickering and wife, Kansas City.

J. Dexter Adams, commander, and F. C. Perkins, Passed Assistant Paymaster, U.S.N., officers on the schoolship Alert, now at San Pedro, are registered at the Van Nuys Broadway.

J. B. Millard, deputy city superintendent of schools, has gone to Pacific Grove to attend the thirty-fifth annual session of the California Teachers' Association which began yesterday and will continue all week.

John W. Hunt of Washington, D. C. owner of the Angelus Hotel, registered with his wife yesterday at that house, where they will remain this winter. They have been staying temporarily at the Raymond Passaders.

If it had been a Christmas tree for the old sports outside on the hobo corner, the sight of two Santa Clauses would not have caused any alarm. They are used to seeing things double. The old Weary Willies would have sighed with placid resignation and thought, each to himself, "Got 'em again."

Happily, there were no hostilities. The two Santas shook hands and began handing out the presents. It was like a "sister act" in he vaudeville. But there was the wildest excitement.

BUSINESS

twentieth century:

The specialist will be the dominating force in the business world of the twentieth century. The road to success lies liong that line. Let the young man who starts out in life today or to-horrow concentrate on one thing, and he has the golden key.

Industries have been rearranged. They are now separated into departments instead of plants. At the head of each of these departments is wanted a man who knows all about this particular division, who has concentrated his entire mind and ability on its requirements and possibilities, who is, in fact, a highly-trained, highly-developed beckellst. Mon like these are scarce loday. Hundreds of institutions are lowing for them. Salaries ranging for them. Salaries ranging for them. Salaries ranging for them, and the salaries ranging for them. My own concern is looking for head a dozen specialists today, rubber seen, lumber men, etc. We would the study pay them 15000 are waiting for them is a great deal more valuable to his concern than the 15000 man. Buthe has got in he as 115,000 man. Buthe has got in he as 115,000 man. Buthe has got in he as 115,000 man. Naturally he is not plentiful.

Business in a concrete form has exited as long as the world's record tune; and until recently its course of development has been practically the same as in the beginning. Now, however, we are suddenly face to face with her world. It is doubtful if the man of the people appreciate this, yet is a sa palpable to the man who has its eyes open as is the knowledge that we obtain the beginning has been our own time the crude business system of our furnity and that we continued in our own time the crude business system of our furnity and that we continued in our own time the crude business system of our furnity and the beside that we continued in our own time the crude business system of our furnity and the life of the world. In a few years we shall some argain as he he belief that we also a second the power to the world.

J. J. Hill, president of the Great Northern Railway, is a magnificent example of the possibilities that lie before a specialist. Mr. Hill is a specialist, has always been a specialist. He has devoted his entire time, attention and ability to railroading. He is today the greatest railroad operator in the world. There is nothing about the business that he doesn't know thorthe greatest railroad operator in the world. There is nothing about the business that he doesn't know thoroughly. He has studied the business from A to Z, and is master of all its itetalis. Thanks to this thorough knowledge Mr. Hill has made himself one of the richest men in America.

Capital is always eager to associate itself with such men, but capital is mighty shy in having to do with men who are not master specialists. In my own case I always insist that my associates shall be specialists. I am alsociates shall be specialists. I am al-

Produce markets open somewhat quietly, as is natural at the very close of the year. There are very few changes in values to note, none of much significance.

Eggs are very scarce and firm. Strictly fresh ranch sell at 23 cents, and selected storage stock at 24 cents.

Butter is also firm, and good to fancy grades selling at outside prices.

Cheese is firm and sure to be so for

a considerable time, a very long one unless rain comes soon.

The supply of live poultry is fair, and the demand is so, too. Dressed eastern poultry is in rather light supply this week. Turkeys are almost scarce.

Receipts of fresh fish are semewhat larger than last week, but an active demand keeps stocks well cleaned up. Provisions are generally firm.

The situation in wheat is a very strong one, and flour is firm in sympathy.

Rats as Tight Rope Walkers.

The presence of rats in the residence portion of the city is more than usual and attempts are being made to kill them off. A peculiar method is followed by the rodents in traveling from one house to another. A few evenings ago a lady was sitting on her verands when her attention was attracted by what she first thought was a huge lisard crawling along an electric-light wire which connected with the house. She soon discovered her mistake, as the "lisard" was a big rat. He traveled along the wire keeping his equilibrium and reached his destination safely.—[Honolulu Commercial.

DEATH OF MRS. FITHIAN.

THY THE NEW ASSOCIATED PRESS. A.M.I.
SANTA BARBARA, Dec. 30.—Mrs.
Fithian, the widow of the late Joel A.
Fithian, passed quietly away in Paris,
France, at 6:15 Sunday morning, according to a cablegram received here tate last evening. Mrs. Fithian became suddenly ill on Christmas with a clot on the brain, and from the commencement of the attack never reasined consciousness. The remains will be brought to Santa Barbara about ten years and and two daughters. The Fithians came to Santa Barbara about ten years ago and have been prominently identified with the progress and growth of this city. Mrs. Fithian was a woman of large means and was a social leader here.

ORANGE GROWERS' COMPLAINT. ORANGE GROWERS' COMPLAINT.

ANAHEIM, Dec, 30.—[From The Times' Correspondence.] Much injury to orange trees, resulting from fumigation work, is charged against Horticultural Commissioner Huntington. Ernest Kossert, a grower, claims the loss of nearly \$1000. He was notified by Huntington that his trees must be fumigated. He instructed Huntington to go ahead and do the work, and Huntington complied with the request, and it is said, through instructed Huntington to go ahead and do the work, and Huntington compiled with the request, and it is said, through a preparation, left the grove in a badly injured condition. Kossert refused to pay the charges demanded by Huntington, and explained the case to the Supervisors, who admitted that Huntington might have damaged the trees, but refused to reduce the bill, giving notice that unless it was paid the full amount would be charged against his property and turned over to the tax collector. It is reported that other orange growers will join Kossert to demand an investigation of the Horticultural Commissioner's work.

AN ODDITY IN NATURE.

Imprisoned Bear, Dog and Sheep Found Living Amicably in an Abandoned Mine Shaft.

Mine Shaft.
[Denver Correspondence Chicago Inter-Ocean:] Thomas J. Holland, State 8 perintendent of Fish Hatcheries, was prospecting for coal in Gunnison county the other day. He had been out all day, and in taking what he thought was a short cut to Game Warden James Bush's cabin he lost his way.

mountain rats from which the dog got a good living.

Why the bear was not able to catch the sheep is something that Holland does not know, but he believes that the dog, who seemed a good friend to the sheep, diverted the bear's pursuit whenever bruin went after mutton.

The dog and the sheep, too, seemed in ecstacy at the death of their enemy, the bear. The dog capered about the carcass, barking and tearing at the hide, while the sheep stood by looking on with solemn eyes.

on with solemn eyes.

Holland made his way to the surface of the ground. He left his coat behind as evidence to the dog that he would come back for him. The dog seemed to understand his action. He lay down upon it and looked up with a satisfied expression that Holland interpreted easily.

The man said afterward that it was as solemn a promise as he had ever made, and, although he did not keep it until the next day, he paid the game warden a day's wages to go with him to rescue the animals. They were hauled up with a rope, and their delight when they reached the top knew no bounds.

The sheep Holland gave to Warden Bush, and the dog is the only one that is ever allowed in the marble halls of the State Capitol, where Holland's

The hopeful view consumpives take of their own cases is strongly in their favor. Each year is showing a larger perentage of cures.

One of the best reasons for good hope is the record of Scott's Emulsion as a medicine for consumptives. So long as the system is strong enough to use medicine of any kind it can use Scott's Emulsion.

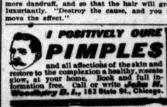

The reason for its helpfulness in this disease is because of its long tolerance by the patient; one does not tire of

PATE OF CONSOLIDATION WILL SOON BE SETTLED.

Wednesday, January 1, is the date fixed for the affairs of the Associated Oil Company to come to a focus. For months the promoters of the Kera combine have been fighting with the problems that have arisen in the effort to consolidate the big producers of that field, and for some time past daily sessions have been held in San Francisco. As the matter now stands, it appears that the success or failure of the association depends entirely on the Green & Whittier, Canfield, Kern Oil, San Joaquin and Reed Crude interests, as many of the smaller corporations have placed their deeds in escrow to be given up only on condition that the larger companies cast their lot with the Associated Oil Company. The Monte Cristo was originally named as one of the combine, but since that producer has contracted with the Standard company for aimost its entire output, there is no longer any hope of securing its cooperation. CAR SHORTAGE STILL TROUBLES.
The car shortage in the Kern River field is daily becoming more annoying. The Californian is responsible for the statement that nearly every storage tank in the northern field is stored full of oil, and in many instances earthen reservoirs are full to overflowing. The fact that the wells are nearly all closed down is due to this embarrassing shortage. Nearly every company has contracts with outside parties for their product, but they have been unable to live up to them.

Death Passed Him Again.

Yesterday some sort of a fit selzed the paralytic beggar who has been a resture of the town for years, standing on the side streets or tottering wildly down the street on his crutches. He was found unconscious on the sidewalk by a passing policeman and taken to the Receiving Hospital. He revived after some hours, and will probably go back to the streets again to his dreary wait for the death that has passed him cruelly by so many times. His name is Ed Genung. He has had a very piteous sort of life. For eighteen years, he has been a hopeless paralytic, wandering from place to place, depending on charity. He admits that he "does very well." It ain't no complaint to make," he said, "only that I seen this way, so miserable long." Genung was paralyzed in an accident in the lumber camps of Oregon. He was driving a heavy ox cart loaded with tons of logs. He slipped on the ce, and one of the huge wheels passed over his body.
